Professional Program in

Business Analytics

CareerZeta's Business Analytics Professional Program is a six-month, live and applied program that takes you from Excel and SQL to statistics, Power BI, Tableau and Python — then adds a five-week Agentic AI Immersion so you can build AI agents that run analyst work end to end.

 26 modules · 10+ real-world projects · 6 industry case studies

segment	revenue
enterprise	4.82M
mid-market	2.37M
smb	1.19M
consumer	0.86M

Why Business Analytics?

Every Business Runs on Data

Banking, retail, e-commerce, healthcare, logistics and HR all hire analysts to turn data into decisions.

Skills That Travel

Excel, SQL, statistics and BI work in every industry and role, so your options stay open.

From Data to Decisions

Analysts who connect business sense with analytical thinking are the ones companies compete for.

A Career Ladder, Not Just a Job

Grow from Business Analyst to Senior Analyst, Analytics Manager, BI, Strategy and Leadership roles.

AI Makes Analysts Faster

Agentic workflows now automate the repetitive parts of analysis. Analysts who can build them move ahead.

Proof You Can Show

Graduate with real projects and a portfolio an employer can open — not just a certificate.

Careers That **Run on Data**

Business Analytics opens doors to diverse career paths such as:

- ✓ Business Analyst
- ✓ Data Analyst
- ✓ Business Intelligence Analyst
- ✓ Marketing Analyst
- ✓ Financial Analyst
- ✓ Product Analyst
- ✓ Operations Analyst
- ✓ Risk Analyst

As organizations adopt data-driven decision-making, demand for professionals who turn information into business value keeps growing.

Earning **Potential**

Business Analytics can lead to high-value career opportunities with strong growth potential.

1

ENTRY-LEVEL ANALYST

Build expertise with analytical tools and business strategy on real problems.

2

SENIOR ANALYST

Gain experience, own bigger questions and deliver insights leaders act on.

3

ANALYTICS MANAGER

Lead analytics teams and turn insight into better business decisions.

4

BI, STRATEGY & LEADERSHIP

Grow into Business Intelligence, Strategy and Leadership roles.

The Power Is in Your Insight

Ask the right questions. Turn answers into action.

Data That Drives Decisions

Learn the data. Understand the business. Shape the future.

About Program

The Business Analytics Professional Program is built for people who want to turn data into decisions — analyze it, visualize it and present it — and to use AI agents to do that faster. Across eight phases you move from Excel and SQL to statistics, BI and Python, finishing with business applications, a capstone and a five-week Agentic AI Immersion.

By CareerZeta

Capstone
Portfolio-Ready

Key Highlights

- ✓ 26 modules across 8 phases
- ✓ 10+ real-world projects
- ✓ 6 industry case studies
- ✓ 5-week Agentic AI Immersion
- ✓ Capstone project & portfolio review
- ✓ Designed for working professionals & graduates
- ✓ Live sessions with industry practitioners
- ✓ 1:1 mentoring sessions
- ✓ Resume & LinkedIn profile building
- ✓ Mock interview preparation
- ✓ Hackathons & peer network
- ✓ No-cost EMI options

Program Pedagogy

Live Instructor-led Sessions

Learn from practitioners who work with data every day.

Hands-on Projects

Build 10+ projects on real-world datasets.

Industry Case Studies

Work through six cases across finance, marketing, sales, healthcare and more.

1:1 Mentoring

Regular check-ins with a mentor to guide your transition.

Hackathons

Solve real problems in teams and showcase your skills.

Peer & Alumni Network

Learn with a cohort and stay connected for referrals and support.

Portfolio Review

Mentor feedback on your capstone and projects before you apply.

Agentic AI Labs

Build, test and govern AI agents that automate analysis.

Who Is This **Program For?**

- ✓ Working professionals moving into a business analyst role
- ✓ Excel users ready to step up to SQL, Power BI and Python
- ✓ Sales, marketing, finance, operations and HR professionals who work with data every day
- ✓ Graduates who want a hands-on start in business analytics
- ✓ Anyone who wants to build AI agents into their daily work

How to **Join**

Four steps take you from application to your first live session.

1

SUBMIT YOUR APPLICATION

Tell us about your background and why you want to move into business analytics.

2

SCREENING CALL

A short conversation with our admissions team to understand your goals and confirm program fit.

3

ENROLLMENT & ONBOARDING

Secure your seat, get access to pre-work, and meet your cohort before day one.

4

KICK OFF MODULE 01

Join your first live session and start building from week one.

Flexible Payment

No-cost EMI options available

Cohort Size

Kept small for real mentor access

Your Journey

○ Core phases

● Agentic AI

PHASE 1 · BUSINESS & DATA FOUNDATIONS

Module 01

Introduction to Business Analytics

- What is Business Analytics?
- Business Analytics vs Data Analytics vs Data Science
- Types of Analytics: Descriptive, Diagnostic, Predictive & Prescriptive
- The Analytics Lifecycle: Business Problem → Data → Insights → Decisions
- KPIs, Metrics & Business Objectives
- Framing a Business Question
- Role of a Business Analyst

Module 02

Data Literacy & Data Understanding

- Types of Data
- Structured vs Unstructured Data
- Data Sources & Data Collection
- Data Quality & Data Validation
- Data Cleaning Fundamentals
- Understanding Business Datasets
- Data Privacy & Responsible Data Use

PHASE 2 · EXCEL FOR BUSINESS ANALYTICS

Module 03

Excel for Data Analysis

- Excel Fundamentals
- Data Cleaning & Transformation
- Formulas & Functions
- Lookup Functions
- Conditional Functions
- Pivot Tables & Pivot Charts
- Data Validation
- Charts & Dashboards
- What-if Analysis
- Introduction to Power Query

Module 04

Advanced Excel & Business Modeling

- Advanced Lookup Techniques
- Dynamic Functions
- Advanced Pivot Tables
- Scenario Analysis
- Goal Seek & Solver
- Financial & Business Models
- KPI Reporting
- Automated Management Reports

PHASE 3 · SQL & DATABASE ANALYTICS

Module 05

SQL Fundamentals

- Databases & Relational Data
- SELECT, WHERE, ORDER BY
- Filtering & Sorting
- Aggregations
- GROUP BY & HAVING
- Joins
- Subqueries
- CASE Statements

Module 06

Advanced SQL for Business Analytics

- CTEs
- Window Functions
- Ranking & Segmentation
- Date & Time Analysis
- Advanced Joins
- Cohort Analysis
- Customer & Revenue Analytics
- Query Optimization Fundamentals

PHASE 4 · STATISTICS FOR BUSINESS DECISIONS

Module 07

Descriptive Statistics

- Mean, Median & Mode
- Variance & Standard Deviation
- Probability Fundamentals
- Distributions
- Sampling
- Correlation & Covariance
- Outliers

Module 08

Inferential Statistics & Hypothesis Testing

- Population vs Sample
- Confidence Intervals
- Hypothesis Testing & p-values
- t-test, Chi-square Test & ANOVA
- Correlation & Regression
- A/B Testing
- Statistical Interpretation for Business

PHASE 5 · DATA VISUALIZATION & BI

Module 09

Data Visualization

- Principles of Data Visualization
- Choosing the Right Chart
- Storytelling with Data
- Comparative Analysis
- Trend Analysis
- Distribution Analysis
- KPI Visualization
- Avoiding Misleading Visualizations

Module 10

Power BI for Business Intelligence

- Power BI Ecosystem
- Data Import & Transformation
- Power Query
- Data Modeling & Relationships
- DAX Fundamentals
- Calculated Columns & Measures
- Interactive Reports & Dashboards
- Drill-down & Filters
- Power BI Service & Sharing

Module 11

Tableau for Business Analytics

- Tableau Fundamentals
- Connecting Data
- Dimensions & Measures
- Calculated Fields
- Filters & Parameters
- Dashboards
- Interactive Visualizations
- Storytelling with Tableau
- Business Reporting

PHASE 6 · PYTHON FOR BUSINESS ANALYTICS

Module 12

Python for Data Analysis

- Python Fundamentals
- Variables, Data Types & Functions
- Lists, Dictionaries & Loops
- NumPy
- Pandas & DataFrames
- Data Cleaning
- Data Transformation
- Exploratory Data Analysis

PHASE 6 · CONTINUED

Module 13

Python Visualization & Analytics

- Matplotlib
- Seaborn
- Statistical Analysis with Python
- Correlation Analysis
- Business Data Visualization
- Automated Reports
- When to Use Python over Excel
- End-to-End Python Analytics Project

PHASE 7 · ADVANCED BUSINESS ANALYTICS

Module 14

Predictive Analytics

- Introduction to Predictive Analytics
- Regression
- Classification
- Decision Trees
- Model Evaluation
- Feature Selection
- Forecasting Fundamentals
- Business Forecasting
- Predicting Customer Behaviour

Module 15

Machine Learning for Business

- Machine Learning Fundamentals
- Supervised vs Unsupervised Learning
- Linear & Logistic Regression
- Decision Trees & Random Forest
- Clustering
- Customer Segmentation
- Model Interpretation
- Business Applications of ML

PHASE 8 · BUSINESS APPLICATIONS

Module 16

Marketing Analytics

- Customer Segmentation
- Campaign Analysis
- Marketing Funnel
- Conversion Analysis
- Customer Acquisition Cost
- Customer Lifetime Value
- Campaign ROI
- Churn Analysis

Module 17

Sales & Revenue Analytics

- Sales Performance
- Revenue Analysis
- Sales Funnel
- Pipeline Analysis
- Product Performance
- Pricing Analytics
- Forecasting
- Sales Territory Analysis

Module 18

Financial & Operational Analytics

- Financial KPIs
- Profitability Analysis
- Cost Analysis
- Budget vs Actual
- Working Capital
- Inventory Analytics
- Supply Chain Analytics
- Operational KPIs

Module 19

Customer & HR Analytics

- Customer Experience Analytics
- Retention & Churn
- Customer Lifetime Value
- Employee Performance
- Attrition Analysis
- Workforce Analytics
- HR KPIs

5-Week Agentic AI Immersion

Seven modules on designing, connecting and governing AI agents — pointed at the work business analysts actually do: mapping processes, spotting automation wins and building the business case.

Module 1

Agentic AI Fundamentals

- Basics of Machine Learning and Generative AI
- Agent architecture
- Agents vs chatbots vs automation
- Single vs multi-agent design
- When to use/not use agents

Module 2

AI Use-Case & Business Process Analysis

- Process mapping
- AI opportunity identification
- Task decomposition
- Automation assessment
- Human vs AI responsibilities
- Agent feasibility
- ROI and business case

Module 3

Prompt & Context Engineering

- Prompt design
- Structured prompts
- Few-shot prompting
- Prompt templates
- Context engineering
- Business rules

Module 4

Tools, APIs & MCPs

- Tools orchestration
- APIs
- MCPs
- Connecting agents to enterprise systems
- Database/API integration

Module 5

RAG Implementation

- RAG architecture and pipeline
- Filtering types
- Vector databases and Embeddings
- RAG evaluation

Module 6

Agent Memory, Planning & Workflows

- Memory management
- Planning
- Task decomposition
- Sequential workflows : Chain of thought
- Conditional workflows
- Agent loops
- Human in the loop
- multi-agent orchestration

Module 7

Agent Evaluation, Guardrails & Governance

- Agent evaluation
- Hallucinations check
- Guardrails
- Observability
- Governance

Skills to Master

- Excel & Business Modeling
- Exploratory Data Analysis
- Tableau
- KPI & Performance Reporting
- SQL & Query Optimization
- Statistics & Hypothesis Tests
- Data Storytelling
- Marketing & Sales Analytics
- Python, pandas & Matplotlib
- Power BI & DAX
- Predictive Analytics & ML
- Agentic AI Workflows

AI & Data Tools

Gain hands-on experience with industry-leading tools and technologies that power Data Science, AI and Analytics across the globe.

...and many more!

Projects and case studies cover the following industries:

Finance

Healthcare

Retail

E-commerce

Marketing

Logistics

Pharma

Beginner

Complex SQL Sub-Queries

Solve complex database problems with SQL subqueries. Work with IN, NOT IN, EXISTS, NOT EXISTS, ANY and ALL to filter, compare and retrieve data efficiently – and see how advanced queries apply to real-world business data.

Beginner

Query a Large Relational Database

Work with large relational datasets and retrieve meaningful customer information using SQL. Apply tables, data types, functions and operators to query effectively – and learn how businesses organize, access and analyze structured data.

Intermediate

Design a Relational Database

Learn how relational databases organize connected information for efficient analysis. Analyze global sales and profit data, then build an interactive map with styles and layers that turns business data into clear geographical insights.

Intermediate

Customer Segmentation & Personalization

Segment customers using demographic, geographic and behavioral data. Identify distinct groups and design personalized strategies, offers and recommendations that improve targeting, engagement and marketing effectiveness.

Advanced

Planning Poker

Experience collaborative estimation through Planning Poker, an Agile decision-making technique. Select estimate cards, reveal them together, discuss differences and re-estimate until you reach consensus – building estimation, communication, teamwork and analytical thinking.

Advanced

UK Bank Customer Analytics

Analyze UK bank customer data to discover meaningful patterns and insights. Build an interactive dashboard with an asymmetric drop-down that connects regions to customer details – practicing customer analytics, visualization, filtering and financial interpretation.

Advanced

Global COVID-19 Mortality Analysis

Analyze global COVID-19 data to understand mortality rates and geographical trends. Build an interactive dashboard and world map comparing confirmed cases and deaths across countries, and practice turning large datasets into meaningful real-world insights.

Advanced

Risk Management & Fraud Detection

Build analytical models to evaluate credit, fraud and operational risks. Identify unusual patterns and suspicious activity with data-driven techniques, and see how organizations use anomaly detection and fraud analytics to spot threats and support faster, smarter decisions.

Advanced

Supply Chain & Vendor Analytics

Analyze supply chain and vendor data to improve inventory management, lead times and supplier performance. Identify cost-saving opportunities and process improvements that optimize procurement, reduce inefficiencies and strengthen vendor relationships.

Advanced

Business Performance Dashboard & KPI Monitoring

Create interactive dashboards that monitor revenue, profit margins, customer satisfaction and market share. Analyze trends, flag anomalies and present insights visually to support faster, data-driven management decisions.

Capstone & **Portfolio**

The program closes with an end-to-end capstone: frame a business question, source and model the data, ship a dashboard and report, present it to stakeholders — then shape it all into a portfolio an employer can open.

- ✓ End-to-End Capstone Project
- ✓ Problem Framing & Data Sourcing
- ✓ Analysis, Modelling & Validation
- ✓ Dashboard & Report Delivery
- ✓ Presenting to Stakeholders
- ✓ Building an Analytics Portfolio
- ✓ Interview-Ready Walkthroughs

```
df_csv("sales_2026.csv", parse_dates=["date"])
df = df.drop_duplicates(subset=["region"])
df.groupby(df.date.dt.to_period("M"))["revenue"]
risk" = model.predict_proba(X_test)[: , 1]
plt.subplots(figsize=(12, 5))
```

```
SELECT c.segment, DATE_TRUNC('month', o.order_date) AS month,
SUM(o.order_value) AS revenue, COUNT(o.order_id) AS orders
FROM orders o JOIN customers c ON c.customer_id = o.customer_id
WHERE o.order_date >= DATE '2026-01-01'
GROUP BY c.segment, month
```

Six case studies put the full toolkit to work on the kinds of problems business analysts are hired to solve — each one framed around a real industry question and the decision it has to support.

FINANCE

Credit Risk Analysis

Analyze customer financial data to assess creditworthiness and repayment risk. Develop risk models that help lenders make faster decisions, reduce defaults and improve portfolio performance.

MARKETING

Marketing Campaign Optimization

Evaluate campaign data across digital channels to understand what drives engagement and conversions. Find the best campaigns, audiences and channels, then optimize budgets to improve ROI.

SALES

Sales Performance Analytics

Analyze sales across products, regions and teams to find performance trends and growth opportunities. Track targets, conversion rates and revenue to sharpen strategy and drive sustainable growth.

HEALTHCARE

Patient Flow Optimization

Analyze patient arrival, treatment and discharge data to find workflow bottlenecks. Optimize staffing, scheduling and resource allocation to cut waiting times and improve the patient experience.

E-COMMERCE & MARKETING

Customer Segmentation

Analyze behavior, purchase history and preferences to build meaningful customer segments. Design personalized campaigns, offers and recommendations that lift engagement, conversions and retention.

PHARMA

Pharma Sales & Demand Forecasting

Analyze historical sales, prescription and market data to forecast product demand. Identify regional trends and shifting patterns to support inventory planning, sales strategy and distribution.

What We Offer

1:1 Mentoring Sessions

Regular check-ins with a mentor to guide your transition into business analytics.

Resume & LinkedIn Profile Building

Craft a resume and profile built around the projects you actually shipped in this program.

Hackathons

Work on real-world problems, build solutions in teams, and showcase your skills to industry mentors.

Mock Interview Preparation

Practice with the questions employers actually ask business analytics candidates.

Career-Oriented Sessions

Live sessions on negotiation, career trajectory planning, and workplace communication.

Portfolio Review

Mentor feedback on your capstone and project portfolio before you start applying.

Alumni & Peer Network

Stay connected to a growing community of CareerZeta learners for referrals and support.

Placement Support

Get access to hiring partners, job opportunities and dedicated support to help you land the right role.

Top Destinations

```
hiring = ["Amazon", "Uber", "Microsoft", "KPMG"]
you.apply(hiring, portfolio=True, mock_prep=True)
support = CareerZeta.placement_support()
# resume + portfolio + practice = interview-ready
print("Next stop: your new ID badge.")
```

Companies across technology, banking, consulting, consumer and fintech that hire for the skills this program builds.

Top Faculty with CareerZeta

```
from careerzeta.faculty import Practitioners
mentors = Practitioners(day_jobs=True)
you.learn_from(mentors, live=True, doubts="all")
# war stories > textbook theory, every time
print("Mentor review: approved. Ship it!")
```

Learn from practitioners who build with data, engineering and AI in their day jobs.

About **CareerZeta**

CareerZeta is a global edtech platform committed to empowering professionals with industry-relevant, future-ready skills. We deliver practical, career-focused learning experiences designed to help working professionals upskill, advance their careers, and confidently transition into new roles and domains.

Our programs combine expert-led learning, hands-on projects, industry insights, and cutting-edge technology to help professionals stay ahead in today's rapidly evolving digital economy.

Whether you are looking to strengthen your expertise, take the next step in your career, or switch to a new professional profile, CareerZeta provides the skills, guidance, and practical exposure needed to move forward with confidence. We believe professional learning should be practical, accessible, and outcome-focused — helping individuals turn their ambitions into relevant skills, greater confidence, and meaningful career opportunities.

Our **Programs**

Business Analytics

Turn data into strategic insights and make better business decisions.

+ AGENTIC AI INTEGRATION

Data Analytics

Extract meaningful insights, solve real-world problems, and drive business impact.

+ AGENTIC AI INTEGRATION
